

MOHAMMAD KASHIF

Medical & Healthcare Writer (Non-Clinical)

| New Delhi, India – 110076 | Open to Remote (International) |
| +91-6386686887 | Kashif.157298@gmail.com |
| [LinkedIn](#) | [Website](#) | [Portfolio: Flagship Healthcare Data Interpretation Explainer\(PDF\)](#)

PROFESSIONAL SUMMARY

Medical graduate with an internationally verified degree, currently focused on non-clinical healthcare data interpretation and medical communication. Bridges clinical context with clear, structured explanation to support health-tech, analytics, and research-oriented teams with informational, non-patient-facing content. Skilled in translating complex medical concepts into structured, plain-language explanations while maintaining clear scope boundaries and data-privacy awareness. Actively building a portfolio aligned with healthcare systems, data analytics, and internal knowledge communication.

Selected Non-Clinical Writing Samples

- **What Healthcare Dashboards Show and What They Quietly Leave Out -**

Business-style explainer on interpreting healthcare dashboards and understanding common blind spots.

- **Plain-Language Diabetes Transformation (Before and After) -**

Demonstrates controlled simplification of clinical information for general audiences while preserving medical accuracy.

- **HL7 — A Simple Explainer -**

Technical healthcare interoperability concept explained for non-technical stakeholders.

- **Why Small Data Errors Matter in Healthcare Analytics -**

Explainer on how minor data quality issues can scale into major misinterpretations in healthcare systems.

Additional background samples, including patient-oriented educational content, are available upon request.

CORE SKILLS & CAPABILITIES

Healthcare Data Interpretation

- Understanding and explaining healthcare datasets, reports, and summaries
- Identifying assumptions, limitations, and common sources of misinterpretation

Clinical Context Translation

- Broad foundational understanding of medical concepts across specialties, used strictly for contextual explanation.
- Translating medical terminology and clinical concepts for non-clinical audiences
- Providing context around clinical workflows without patient-level decision-making

Medical Research Literacy

- Reading, synthesizing, and summarizing medical and healthcare information from multiple sources.
- Interpreting findings at a high level without regulatory or clinical sign-off

Plain-Language Health Communication

- Converting complex medical information into clear, structured explanations
- Writing informational content suitable for general or non-clinical audiences

Documentation & Knowledge Structuring

- Organizing healthcare information into briefs, explainers, and internal guides
 - Editing and refining healthcare-related content for clarity, structure, and consistency.
 - Supporting knowledge-sharing across product, analytics, and research teams
-

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- **Foundational Skills for Communicating About Health (University of Michigan, Coursera) — Ongoing**

Focus: Communicating health and Healthcare data clearly to non-specialist audiences.

- **Healthcare Information Literacy for Data Analytics (UC Davis, Coursera) — Ongoing**

Focus: healthcare datasets, data quality, interpretation risks, and responsible use of health data in non-clinical contexts.

- **Google Data Analytics Professional Certificate (Coursera) — Ongoing**

Focus: data cleaning, aggregation, visualization, and interpretation principles applied to real-world datasets.

- **UKMLA / PLAB 1 — Passed**

Demonstrates foundational clinical knowledge and standardized medical assessment exposure.

- **NSGE International Conference | 2024**

- **VIA Training (Obstetrics and Gynecology) | 2022**

EDUCATION

Doctor of Medicine (MD) | Graduated October 2023
Central America Health Sciences University (CAHSU), Belize, Central America

- *EPIC / ECFMG verification completed*
 - *TrueProfile (DataFlow) verification in progress*
-

RELEVANT EXPERIENCE

Community Health Education & Documentation Support (Volunteer) | January 2024 - January 2025
Rural Training Health Centre Kalantra, Jammu & Kashmir

- Supported community health education activities by assisting with the organization and explanation of general health information in a non-clinical, informational manner.
 - Helped summarize and organize non-identifiable health observations and program activities for internal documentation and learning purposes.
 - Assisted with structuring educational materials related to common public-health topics, without providing individualized medical advice.
 - Observed healthcare workflows and documentation processes under supervision to understand how clinical information is recorded and communicated.
 - Contributed to basic record clarity and completeness for internal use, focusing on readability rather than clinical judgment.
-

LANGUAGES

- **English** - Proficient (**IELTS Academic: Overall 8.0**)
 - **Urdu** - Native
 - **Hindi** - Fluent
 - **Kashmiri** - Native
 - **Nepali** - Fluent
-

Educational background in medicine; currently focused on non-clinical healthcare data interpretation, documentation, and medical communication.
